

Appendix 7 Municipal Hazard Mitigation Maps

Local Hazard Mitigation maps have been prepared for each of the 22 Towns and Villages in Schoharie County, similar to the sample below. The GIS (Geographic Information System) maps are in digital Adobe.pdf format and are available at the Schoharie County Planning and Development Agency.

A printed 8.5 x 11 copy of the map is included in the original printed copy of the Hazard Mitigation Plan provided to each town and village. Each town and village has also been provided with a wall size copy of the map for display at their municipal hall.

The jurisdictional maps include general hazard mitigation planning references for the community; such as hazardous areas and sites, primary streets and highways and vulnerable facilities - where such graphical representation is practical. The maps also include a list of the 'hazards of concern' for the community and a summary of its hazard mitigation priorities and goals.

Sample municipal map (not actual size)
